EDUCATION & TRAINING

University of Pennsylvania

Aug. 2026 – present

Postdoctoral Researcher, Department of Materials Science and Engineering

Research Topic: *Electrochemical Interfaces and Engineering in CO₂ and Nitrate Electroreduction*

Advisor: Dr. A. Shoji Hall

The University of Texas at Austin

Aug. 2021 – Aug. 2026

Ph.D. in Analytical Chemistry, GPA: 4.0/4.0

Dissertation: *Electrolyte Engineering and Interfacial Electrochemistry in Aqueous Zinc Metal Batteries*

Advisor: Dr. C. Buddie Mullins

Central South University, China

Sept. 2016 – Jun. 2020

B.S., Materials Science and Engineering, GPA: 3.9/4.0, *Summa Cum Laude*

Thesis: *Aqueous Electrolyte Regulation on Vanadium-Based Cathode Materials*

University of California, Los Angeles

Jul. 2019 – Sept. 2019

CSST Undergraduate Fellow, Chemical and Biomolecular Engineering, GPA: 4.0/4.0

RESEARCH INTERESTS

My research focuses on mechanistic interfacial electrochemistry for energy storage and conversion, with an emphasis on connecting electrolyte structure, charge-transfer kinetics, mass transport, and operando interfacial electrochemistry to the design of metal batteries and electrocatalysis systems.

PUBLICATIONS

| ➤ Battery Division Student Research Award, ECS | 2026 |
| ➤ Graduate School Professional Development Award, UT Austin | 2026 |
| ➤ Robert Smith Davis and Lyell Pickett Davis Scholarship, UT Austin | 2025 |
| ➤ Jeff Byers Graduate Award, UT Austin | 2025 |
| ➤ Chemistry Department Graduate Student Excellence Award, UT Austin | 2023 |
| ➤ Faraday Teaching Award, UT Austin | 2022 |

- Robert Eakin Centennial Scholarship in Chemistry, UT Austin 2021

Travel Awards

- Allen J. Bard Center for Electrochemistry Conference Travel Grant, UT Austin 2026
- MDPI *Batteries* Travel Award, MDPI 2026
- Allen J. Bard Center for Electrochemistry Conference Travel Grant, UT Austin 2025
- ECS Travel Award, ECS 2024

Academic Honors

- Outstanding Graduates (*Summa Cum Laude*), CSU 2020
- Outstanding Student at Central South University, CSU 2017 – 2019

Awarded Workshop Participation

- 2026 Next Generation Electrochemistry (NGenE) Workshop Fellowship, Argonne 2026
- CAS Future Leader TOP 100 program, ACS 2026

PROPOSALS & GRANTS

- DOE Genesis Mission (**participant**) 2026
AI-Driven Descriptor Discovery and Digital Twin Platform for Energy Materials Design, Development, and Qualification (High-Entropy Electrolyte for Aqueous Batteries)
- NSF: Division of Chemistry (CHE-DRP) (**core participant**) 2024
Unveiling Reaction Kinetics and Electrochemical Behaviors in High-Entropy Electrolytes for Aqueous Zinc-Ion Batteries
- NSF-Small Business Innovation Research (SBIR) (**core participant**) 2024
Production of Customized Lithium-Ion Battery Electrodes with High Energy and Power Density (2335276)
- NSF-Partnerships for Innovation (PFI) (**\$249,998, core participant**) 2021
Using Ultralight Carbon Aerogel Electrodes to Increase Energy Density of Rechargeable Batteries (1940986)
- Prepared and drafted successful fellowship proposals for UT Dissertation Writing Fellowship (**\$16,665**), Chevron Energy Graduate Fellowship (**\$10,000**), ECS Joseph W. Richards Fellowship (**\$5,000**), UT Graduate School Continuing Fellowship (**\$36,000**), and CEC Student Scholar Fellowship (**\$20,000**).

CONFERENCE & PRESENTATIONS

15. Crystallography-dependent Zn Plating and Stripping Kinetics and Morphological Evolution in Zn Metal Anodes, **Invited Talk**, *Battery Division Student Research Award Sponsored by Mercedes-Benz Research & Development*, 250th ECS Meeting, Calgary, Canada, **2026** (deferred to 251st ECS Meeting).
14. Sandwich-structured aqueous electrolyte with water-content gradient for enhanced longevity and reaction kinetics in zinc metal batteries, **Oral Presentation**, selected for ACS Sci-Mix Poster Presentation, *ACS Fall 2026*, Chicago, IL, **2026**.
13. Facet-dependent plating/stripping kinetics and dissolution morphology of zinc in aqueous zinc metal batteries mapped by scanning electrochemical cell microscopy, **Oral Presentation**, *ACS Fall 2026*,

Chicago, IL, **2026**.

12. Enhanced interfacial stability and reaction kinetics through solvation engineering and water-induced hydrolysis in zinc metal batteries, **Oral Presentation**, selected for ACS Sci-Mix Poster Presentation, *ACS Fall 2026*, Chicago, IL, **2026**.
11. Beyond conventional methods for evaluating charge transfer kinetics in aqueous zinc-ion batteries: Insights from ultramicroelectrode voltammetry and Marcus–Hush theory, **Oral Presentation**, selected for ACS Sci-Mix Poster Presentation, *ACS Fall 2026*, Chicago, IL, **2026**.
10. Beyond Conventional Methods for Evaluating Charge Transfer Kinetics in Aqueous Zinc-Ion Batteries: Insights from Ultramicroelectrode Voltammetry and Marcus-Hush Theory, **Oral Presentation**, *249th ECS Meeting*, Seattle, WA, **2026**.
9. Electrolyte Engineering and Interfacial Electrochemistry in Aqueous Zinc-Ion Batteries, **Invited Talk** Purdue University, West Lafayette, IN, **2026**.
8. Kinetic Mapping of Metal Electrode Interfaces: From Intrinsic Charge Transfer to Facet-Dependent Reactivity, **Poster Presentation**, *Electrochemistry Gordon Research Seminar*, Ventura, CA, **2026**.
7. Kinetic Mapping of Metal Electrode Interfaces: From Intrinsic Charge Transfer to Facet-Dependent Reactivity, **Poster Presentation**, *Electrochemistry Gordon Research Conference*, Ventura, CA, **2026**.
6. Mass Transfer Limitation Reorienting Crystalline Structures in Aqueous Zinc Metal Batteries, **Oral Presentation**, *ACS Fall 2025*, Washington, D.C., **2025**.
5. Mass Transfer Limitation within Molecular Crowding Electrolyte Reorients Preferential (100) and (101) Texture for Dendrite-Free Zinc Metal Batteries, **Oral Presentation**, *246th ECS Meeting (PRiME 2024)*, Honolulu, HI, **2024**.
4. Electric Double Layer Modification Induces Progressive Nucleation and Nanoscale Zinc Deposition for Aqueous Zinc Metal Batteries, **Poster Presentation**, *246th ECS Meeting (PRiME 2024)*, Honolulu, HI, **2024**.
3. Water Content Gradient Electrolyte for Highly Stable Aqueous Zinc Metal Batteries, **Poster Presentation**, *246th ECS Meeting (PRiME 2024)*, Honolulu, HI, **2024**.
2. Mass Transfer Limitation Reorienting Crystalline Structures in Aqueous Zinc Metal Batteries, **Invited Talk**, *Allen J. Bard Center for Electrochemistry Seminar*, Austin, TX, **2024**.
1. A Urea Modified Ternary Aqueous Electrolyte with Tuned Intermolecular Interactions and Confined Water Activity for Highly Stable Zinc-Ion Batteries, **Poster Presentation**, *244th ECS Meeting*, Sweden, **2023**.

RESEARCH EXPERIENCE

Electrochemical Interfaces in Energy Conversion Systems

Advisor: Dr. A. Shoji Hall

Aug. 2026 – Present

- Interfacial molecular dynamics: Elucidate potential-dependent changes in interfacial solvent organization, ion distributions, and molecular interactions, and establish their relationships with CO₂ and nitrate reduction reactivity.
- Carbonate management: Develop molecular and microenvironmental strategies to suppress carbonate accumulation and electrode passivation, improving carbon utilization and sustaining long-term CO₂ reduction.

- Electrochemically triggered rare-earth separation: Develop a spatiotemporally controlled, nonequilibrium separation strategy that electrochemically generates chelating ligands near the electrode surface to selectively coordinate and precipitate rare-earth elements.

Electrolyte Engineering and Interfacial Electrochemistry for Aqueous Zinc-Ion Batteries

Advisor: Dr. C. Buddie Mullins

Aug. 2021 – Aug. 2026

- Electrolyte design and interfacial regulation: Developed eutectic, water-in-organic, and high-entropy electrolytes to regulate Zn deposition and suppress water-induced side reactions.
- Charge-transfer kinetics: Quantified intrinsic Zn^{2+}/Zn charge-transfer kinetics using fast-scan cyclic voltammetry, ultramicroelectrode voltammetry, Tafel analysis, EIS, and Marcus–Hush analysis.
- Mass transport and crystallographic control: Revealed how ion flux and mass-transfer limitations govern Zn deposition morphology, crystallographic texture, and plating/stripping reversibility.
- Facet-resolved electrochemistry: Applied SECCM and single-crystal Zn electrodes with (002), (100), and (101) facets to resolve facet-dependent plating/stripping kinetics and morphology evolution.

Early Research Training in Energy Materials and Biomaterials

Advisor: Dr. Shuquan Liang, Dr. Guozhao Fang, and Dr. Nasim Annabi

Mar. 2017 – Jul. 2021

- Aqueous zinc-ion batteries: Synthesized vanadium- and manganese-based cathode materials and designed aqueous electrolytes for high-rate, long-cycle Zn-ion batteries, contributing to publications in *eScience*, *Nano-Micro Letters*, *Energy Storage Materials*, and *Journal of Materials Chemistry A*.
- Li/Na-ion batteries and electrocatalysis: Developed electrode materials for Li/Na-ion storage and oxygen evolution, contributing to publications in *Journal of Alloys and Compounds* and *ACS Nano*.
- Polymer biomaterials: Synthesized and characterized triblock copolymers for ocular drug delivery as a CSST Undergraduate Fellow, contributing to publications in *Drug Discovery Today* and *AIChE Journal*.

TEACHING EXPERIENCE

ChE 319: Transport Phenomena

Fall 2025

Teaching Assistant, Instructor: Dr. C. Buddie Mullins

Average teaching rating: **4.7/5.0**

- Assist the professor in preparing lecture slides, homework assignments, and supplementary materials to enhance student comprehension of core concepts.
- Support student learning by leading office hours and help sessions, clarifying complex topics, guiding problem-solving approaches, and reinforcing engineering problems and applications.
- Evaluate student progress by grading quizzes and practical exams, providing feedback to both students and the professor to improve learning outcomes and instructional design.
- Provide practical exam questions aligned with homework content and lead weekly recitations in Fluid Mechanics, Heat Transfer, and Mass Transfer.

CH 204: Introduction to Chemical Practice

2021 – 2023

Teaching Assistant, Instructor: Dr. Paola Sotelo

Average teaching rating: **4.9/5.0**

- Delivered undergraduate lectures to classes of ~30 students, emphasizing core principles in general

and physical chemistry.

- Designed and supervised laboratory experiments that reinforce lecture content, promoting hands-on learning and critical thinking.
- Provided academic support through regular office hours, helping students master course material and improve scientific writing.
- Assessed student performance through quizzes, lab reports, and exams, offering detailed and constructive feedback to aid learning.
- Recipient of the *2022 Faraday Teaching Award*, granted based on faculty nomination and student evaluations for excellence in teaching.

MENTORING EXPERIENCE

Graduate students: Anamika Dixit (UT Austin, Chemistry), Rinish Reddy Vaidyula (UT Austin, Chemistry), Sridhar S.Markandaraj (UT Austin, Chemistry), Yice Wang (UT Austin, Chemical Engineering), and Rohit Sinha (UT Austin, Chemistry)

Undergraduate students: Lauren Allen (UT Austin, Chemistry), Hanjing Chen (UT Austin, Chemical Engineering), Wanling Yang (Nankai University, Visiting)

2021 – Present

- Supervise undergraduates and new graduates in developing independent research projects, fostering their ability to generate innovative ideas and lead their studies.
- Provide hands-on mentorship in experimental design, operation of characterization instruments, and data analysis.
- Hold weekly one-on-one meetings to review research progress, offering constructive feedback and strategic guidance on the projects, and pointing out future plans and directions.
- Offer foundational instruction on electrochemical principles and scientific writing, equipping undergraduates with the skills needed for academic success in graduate school.
- Mentored Lauren Allen, **the first undergraduate in the lab to publish a first-author paper**, and supported Wanling Yang in drafting her first-author manuscript, making her **the second undergraduate in the lab to achieve a first-author manuscript**.
- Provided research and graduate-application mentoring to undergraduate students who later received offers from *Stanford University*, *MIT*, *Northwestern University*, and the *University of Chicago*.

PROFESSIONAL & ENTREPRENEURIAL EXPERIENCE

StandUp Energy LLC.

Co-founder, scientist, and technical lead

2022 – Present

- Design and develop innovative camphene-assisted free-standing electrodes for flexible and high-energy-density lithium-ion batteries.
- Independently execute and optimize all laboratory experiments, serving as the sole technical contributor responsible for end-to-end experimental development within the startup.
- Prepare and evaluate lithium iron phosphate (LFP)/graphite single-layer pouch cells and conduct in-depth analyses of cycling data to optimize performance metrics.
- Conduct mechanical flexibility and electrochemical performance tests on single-layer pouch cells,

comparing electrodes to assess durability and functionality under bending conditions.

- Draft research proposals for competitive NSF National Science Foundation Innovation Corps (I-Corps) and Small Business Innovation Research (SBIR) funding programs.

ACADEMIC SERVICE

Academic Society:

- Student member of *The Electrochemical Society* 2022 – Present
- Student member of the *American Chemical Society* 2023 – Present

Editorial Board:

- *Metals* – Leading Guest Editor for Special Issue: *Metallic Materials and Interfaces for High-Performance Batteries* 2026 – Present
- *Coatings* – Co-Guest Editor for Special Issue: *Advanced Photocatalytic Materials and Coatings for Environmental Remediation* 2026 – Present
- *Frontiers in Chemistry* – Review Editor 2024 – Present

Peer Review Services (over 100 completed journal reviews):

- Journals: *Nature Communications*, *Angewandte Chemie*, *Advanced Materials*, *Advanced Energy Materials*, *Advanced Functional Materials*, *ACS Energy Letters*, *Energy & Environmental Science*, *Chemical Engineering Journal*, *Journal of Energy Storage*, *Small*, *Applied Physics Letters*, *ChemSusChem*, etc.
- 2023 – Present

OUTREACH & COMMUNITY SERVICE

STEM Girl Day

- Served as a volunteer facilitator for UT Austin's annual outreach event that brings together over 10,000 K-12 students and families to explore science, technology, engineering, and math.
- Designed and presented hands-on electrochemistry demonstrations to inspire curiosity in renewable energy and batteries, engaged directly with students in small groups, and encouraged girls to envision themselves pursuing STEM careers.

Graduate Student Recruitment

- Actively participated in departmental recruiting weekends to welcome and support prospective graduate students.
- Met individually with candidates to share insights into research opportunities, departmental culture, and life in Austin, led lab tours and group discussions, and helped create a welcoming environment that emphasized diversity, mentorship, and collaboration.
